

**MIRKA**

# Deros Electric Sanders

**The most compact, ergonomic, & easy-to-use sander in its class**

The Mirka DEROS Electric Sander is developed for effective and dust-free sanding of all kind of surfaces. The smallest and most ergonomic sander on the market is equipped with a brushless motor, which maintains constant speed even under heavy load.

With the lowest vibration values in its class and the unique symmetrical design guarantees that the tool can be used for long periods without fatigue. Mirka DEROS 650CV direct electric random orbital sander is equipped with a 150 mm (6") pad and has a 5mm oscillation, and features an integrated vibration sensor and Bluetooth low energy technology.

- ✓ The lightest sander in its class at just 1kg
- ✓ Very powerful brushless motor
- ✓ Comfortable ergonomic design
- ✓ Low vibration means you can work longer without fatigue

*Finishing*

*General use*

*Heavy removal*

## Deros 625CV - 2.5mm Orbit

Perfect for finishing and refining surfaces, as well as removing finishes and paints. With a much smaller scratch pattern, this sander is used when a very high quality finish is required. Typically used on carbon fibre or high end automotive paint finishes. This sander is not good for stock removal, as it will take too long.

## Deros 650CV - 5.0mm Orbit

This is the jack of all trades, and the highest selling model of Deros sander. Ideal for general sanding tasks on all kinds of surfaces. Generally used on most surfaces including wood, metal, composites, cement and more. This sander has a great balance between efficient stock removal and leaving a great finish with a medium scratch pattern.

## Deros 680CV - 8.0mm Orbit

This is the most aggressive orbit, which makes it ideal for heavy stock removal, ideally suited to coarse sanding applications. Typically used in Automotive Panel Beating, Metal, Outdoor Painting & Restoration, Hardwood & Marine Industries and on any surfaces that require fast and heavy removal. Because of the large scratch pattern left after use, it is suggested to use one of the finer orbit deros sanders before painting.
