

**MIRKA**

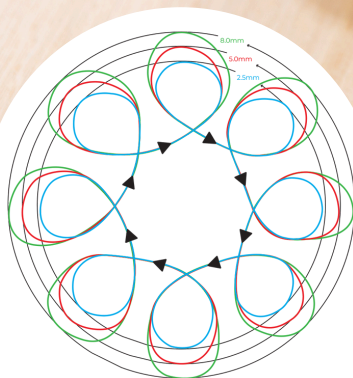

DEROS II

NextGen Sanders

More powerful. Easier to use.

The Mirka Deros Electric Sander is developed for effective and dust-free sanding of all kind of surfaces.

The most ergonomic sander on the market is equipped with a powerful brushless motor, which maintains constant speed even under heavy load.

- ✓ Upgraded 400W motor for extra power in heavy-duty applications
- ✓ LED RPM indicators (4,000-10,000 RPM) for precise and optimal control

Change the backing pad to transform the Deros II into an 125mm sander!

DEROS II 625CV - 2.5mm Orbit

Perfect for finishing and refining surfaces, as well as removing finishes and paints. With a much smaller scratch pattern, this sander is used when a very high quality finish is required. Typically used on carbon fibre or high end automotive paint finishes. This sander is not good for stock removal, as it will take too long.

DEROS II 650CV - 5.0mm Orbit

This is the jack of all trades, and the highest selling model of Deros II sander. Ideal for general sanding tasks on all kinds of surfaces. Generally used on most surfaces including wood, metal, composites, cement and more. This sander has a great balance between efficient stock removal and leaving a great finish with a medium scratch pattern.

DEROS II 680CV - 8.0mm Orbit

This is the most aggressive orbit, which makes it ideal for heavy stock removal, ideally suited to coarse sanding applications. Typically used in Automotive Panel Beating, Metal, Outdoor Painting & Restoration, Hardwood & Marine Industries and on any surfaces that require fast and heavy removal. Because of the large scratch pattern left after use, it is suggested to use one of the finer orbit deros sanders before painting.
