

Abranet[®] SIC NS

The abrasive without stearate

Abranet SIC NS is suitable for finishing glass, plastics, rubber and composites, as well as other hard surfaces.

- ✓ Multifunctional net abrasive without stearate
- ✓ Suitable for finishing glass, plastics, rubber and composites
- ✓ Eliminates clogging and pilling
- ✓ Offers high performance and long life
- ✓ Net abrasives are a key component for dust-free sanding

Abranet SIC NS is a specialty abrasive that uses silicon carbide cutting grains formulated completely without the use of stearate. It has been developed especially for use with glass and is also perfectly suited for use with clear coats, primers, carbon fibre and other composites.

Abranet SiC NS is coated with a dense, uniform layer of silicon carbide grains. A combination of high performance and a longer lifespan than traditional abrasives gives a cost-effective solution.
