- ✓ Excellent quality consistency
- ✓ Fast cut and long life
- ✓ Easy to polish out
- ✓ Prolonged sharpness
- ✓ Uniform cut and scratch pattern
- ✓ Silicon carbide grains and a stable and robust backing results in improved performance

Mirka's new Iridium SR abrasive features excellent consistency and extremely long use life with its efficient silicon carbide grains. With uniformly placed grain material on a stable and robust backing, Mirka Iridium SR produces a class-leading, uniform cut and scratch pattern that is fast and easy to polish out.

Molded onto the carrier material for a uniform surface, the triangular silicon carbide grains form new abrasive edges whenever they break down during the sanding process, prolonging the sharpness of the Iridium SR.

Directed at the finest finishing stages of automotive refinishing and collision repair as well as vehicle and transport manufacturing, the new Iridium SR performs consistently on sanding clearcoat, top coat and lacquers as well as composites processing, for premium results. For unparalleled performance in spot repair work and finishing quality control, Iridium SR is best paired with Mirka's ergonomic cordless tools, the AOS-B and AROP-B.
