Jepuflex Antistatic

Strong antistatic paper
for hard wood, metal,
plastic and more

178mm

- ✓ Perfect for hard wood
- ✓ Very durable
- ✓ Strong and reliable
- ✓ Well-adjusted coating density
- ✓ Also works well on metal, plastic and lacquer

A high class abrasive product with a wide application area. The focus of the optimisation work has been the sanding of hard wood such as beech, birch and oak.

The strong antistatic paper provides dimensionally accurate and reliable wide belts. Full resin bonding and aluminium oxide grain guarantee a very durable product. Silicon carbide grain used in the coarsest grit gives extra strength to the product.

These qualities together with a well-adjusted coating density make Jepuflex Antistatic a genuine all round product that works well also on metal, plastic and lacquer.
