- ✓ Fast & efficient sanding
- ✓ Long lasting
- ✓ Non-clogging multihole discs
- ✓ Premium paper backing
- ✓ Perfect for automotive, wood, composites, construction and marine applications

Produced with cutting edge technology. Perfected for speed and efficiency. Iridium cuts faster with fewer steps from rough to smooth surface finish. Thanks to the new precision coating the abrasive does not wear out easily; it practically repels dust, so the grains stay sharp longer. Dust extraction is efficient and convenient with Mirka's new multihole pattern.

Just place and go. Coarse to fine grits, Iridium works well on both soft and hard surfaces.
